TO ALL INTERESTED PARTIES

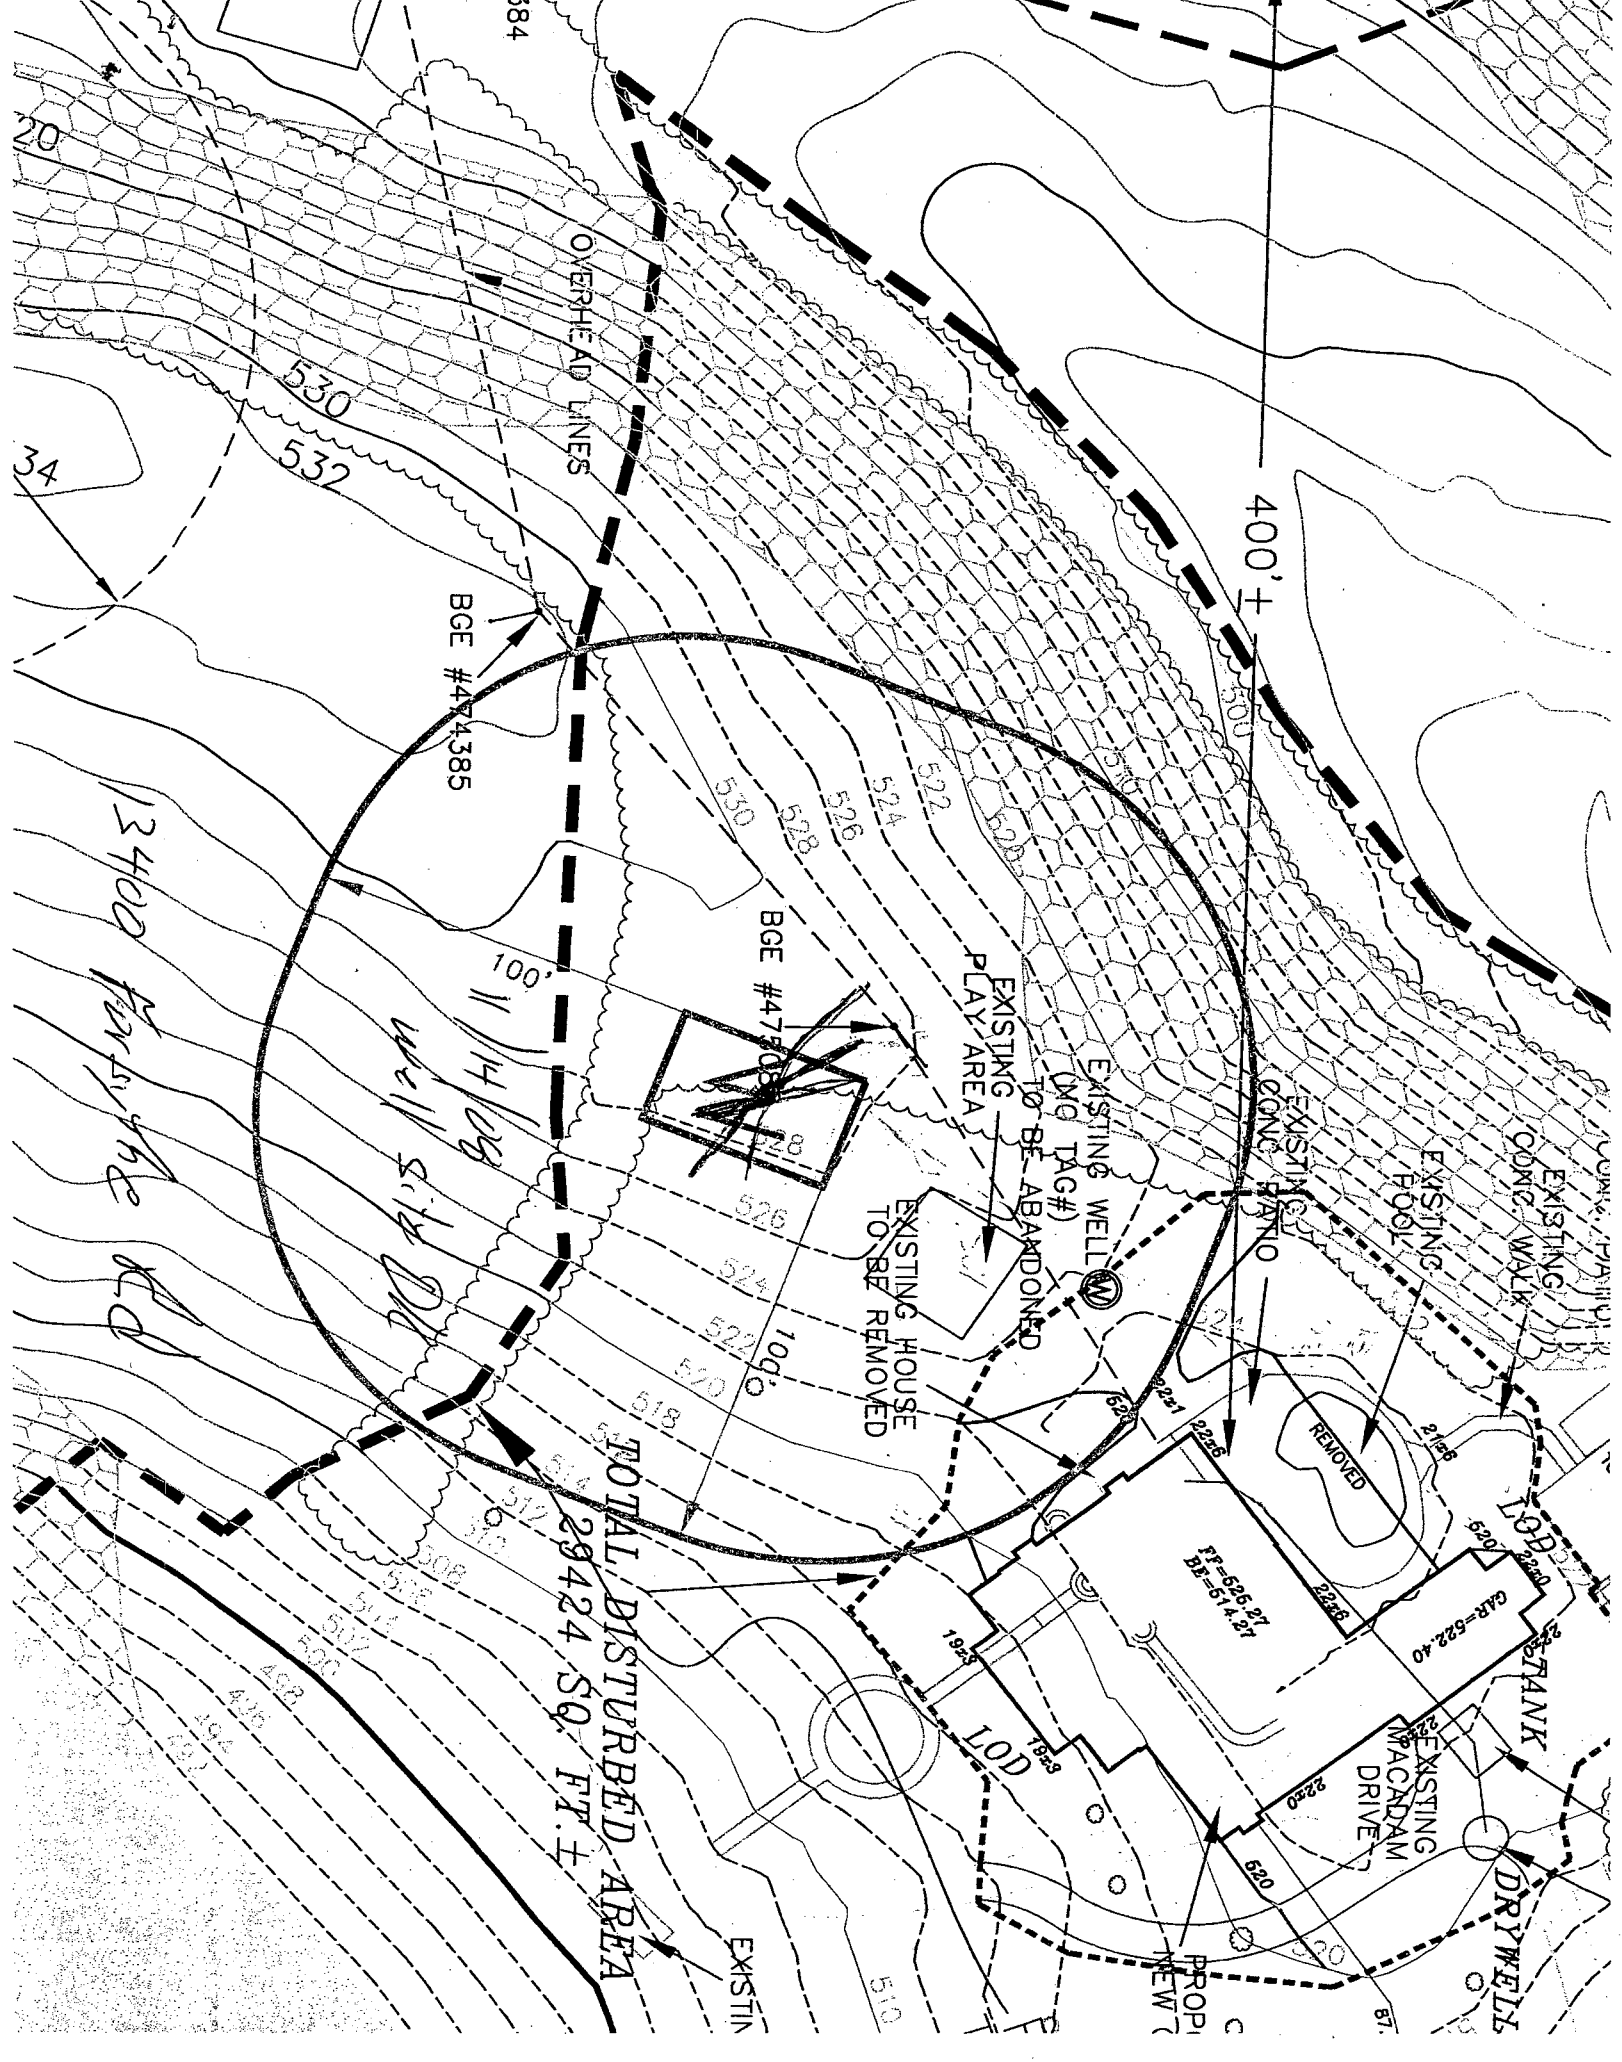

When submitting a well permit application for a proposed well for new construction, please indicate one of the following:

- The well site has been staked by Builder,
 (professional land surveyor or company employing professional land surveyors)
 on 11-4-08 (date) and does not require a site inspection.
- The well driller, builder or property owner will call the Health Department to schedule a time to meet in the field to verify the proposed well site location.

This sheet, along with two copies of an acceptable well site plan, must be attached to the green well permit application.

Well Permit # HO-95-1709

Dear Sir:

This is to advise you that the septic system for the above referenced property has been installed and inspected. **Final approval of the septic system was granted on 07/28/2009. Final approval of the well line connection to the dwelling was approved on 04/08/2009.**

The water sample results indicate that the water samples submitted for testing were free of coliform and fecal coliform bacteria at the time of sampling and are bacteriologically safe for drinking. The water sample results were found to be in compliance with COMAR water quality standards.

Enclosed with this certificate, is a copy of the septic permit and the as-built along with important information regarding the use and maintenance of your septic system. Please read through carefully and thoroughly. Any questions regarding your well and/or septic, please call this office for guidance 410-313-1771.

INTERIM CERTIFICATE OF POTABILITY

This certifies that the initial sampling requirements of COMAR 26.04.04 "Well Regulations" have been met for the water supply system installed under well permit #HO-95-1709. Although the submitted sample results are in compliance with COMAR standards, the Health Department does not guarantee water supplies. Based upon satisfactory investigation and evaluation, the Howard County Health Department as authorized by the Maryland Department of the Environment accepts this well system as required by COMAR 26.04.04.

This certificate may become final upon completion of the second bacteriological test, which is to be taken by the county health department within six months of receipt of this letter. **Please contact (410) 313-1773 to schedule a final water sample appointment. Currently, there is no charge for this final sampling.**

Date of Water Samples: 10/28/2009
Date of Well Completion: 12/10/2008

RE: 13400 Forsythe Road
Map 4, Grid 20, Parcel 45
Tax I.D. 03285642

The Howard County Health Department recommends that the demolition permit for the barn at 13400 Forsythe Road be issued.

A report from Easterday Well Drilling suggests that the existing well on the lot has been properly sealed. The new well needs to be protected from damage during the house demolition and rebuilding phases.

Any existing septic system components, such as a drywell or septic tank, must be pumped out by a scavenger truck and filled with dirt or other suitable materials. This is to be done during the installation of the new septic system. The septic contractor must obtain a permit and call our office for inspections while the new system is being installed.

Please call our office if any additional wells or septic system components are found during the demolition and rebuilding process.

RE: 13400 Forsythe Road
Sykesville, Maryland 21784
61.470 Acre
Map 4, Grid 20, Parcel 45

This is to advise that the Howard County Health Department recommends issuance of the demolition permit for the above referenced property. The existing well will be utilized for the replacement house. By accepting this recommendation, the builder/owner agrees with the following conditions set forth by the Health Department:

Before demolition, the well that served the current house must be properly disconnected and sealed off. Also, protective devices placed around it to prevent any damage. These precautions should remain in place during the demolition and construction phases. The well (No tag) can be reconnected to the new house.

The existing septic system tank and drywell will need to be properly abandoned; i.e. pumped, collapsed and filled in with clean fill. A new 10,000 Sq. Ft. septic reserve area has been established.

A new septic permit will need to be obtained as well as a well inspection will be required for final approval when reconnecting to the new house. Additionally, applicable water tests for issuance of an ICOP will be needed.

Attention: Stuart Oster

Dear Mr. Oster,

Mrs. Dawn Cooke (Cooke Forsythe LLC.) requested that I contact you regarding the Demolition of her home at 13400 Forsythe Road Sykesville, Maryland 21784. The purpose of this letter is to inform you that we will Demo and then rebuild a new home at the same location. We will reuse the well with a new pump and will abandon the existing septic system. We have already been approved by the Health Department for the new and larger septic area. In addition, BGE has discontinued service and removed the meter from the home.

Please fax back a letter that we can submit to Howard County to get our Demolition permit. My fax number is 410-480-4150. Thank you for your cooperation in this matter.

Cordially,

Dick Dohler
