**RE: Variance Approval**  
6802 Norris Lane  
Elkridge, MD 21075

Dear Ms. McCurdy:

The Department of Health has received your waiver request dated September 3, 2013 for the above referenced property. This agency will grant **approval** of the waiver to the required Percolation Certification Plan as required by the *Howard County Code, Subtitle 8, Section 3.805*. The waiver has been approved on the basis that the proposed work does not increase the number of bedrooms in the home and does not impact the area available for future on-site sewage disposal. Please be advised that any increase in the number of bedrooms above five (5) will require the installation of best available technology for removal of nitrogen. Additionally, any future addition may require percolation testing and a Percolation Certification Plan will be required. Deviations from the site plan submitted with the request will be subject to further review by this Department.

Any questions regarding this decision may be directed to the Well and Septic Program of the Howard County Health Department.

Respectfully,

A handwritten signature in black ink that reads 'Michael J. Davis'.

Michael J. Davis, R.S.

Re: Building Permit Application # B13003013

Dear Ms. Scott:

In response to your letter dated August 27, 2013, we hereby request a variance to waive the Percolation Certifications Plan requirement given that the current septic system capacity is adequate to support the planned addition. There are no additional bedrooms in the proposed design, and repairs were made to the existing system in 2010. Details of this work were included with your permit dated May 3, 2010 at 6802 Norris Lane.

Copies of the existing and proposed floor plan, and a site plan are included with this letter. Please contact our office if you have any questions. We hope that this additional information will allow both the variance and permit to move forward.

Sincerely,

Vincent E. Greene AIA
