Attention: John Boris  
Building Permit: B00149857

Dear Mr. Boris:

*→ D.C.W.*  
As home owners, we are requesting a ~~3~~-foot variance for construction of a sunroom to be built on the back of our house. The perc drawing shows shale is closest to house and in septic area. Further from house it shows layer rocks which would not affect the integrity of the septic tank. Please note that the septic tank is off to the side of the new addition – not in front as your plans show.

Any questions, please contact Al Haspert, 410-977-2955.
