

Sept 9, 2004

To Howard County Health Department,

B00150270 - approved
by KNOONAN

This letter is to request a variance for an in ground pool located at 13364 Hunt Ridge in Ellicott City, Maryland. The existing trench is not in the SDA even though the perc was established prior to its installation. On August 30, 2004 a sanitation inspector came to inspect the tank and the trench area and found them to be functioning properly. We request a variance from the setback to be 15' to the in ground pool to the trench. The pool will be lined with waterproof material. We propose to maintain 10' from septic tank and will call for inspection of the septic line and soil integrity. All future trench repair will be done in approved SDA.

Thanks

Barry Wyels
