Columbia, MD 21046

Dear Mr. Davis,

This is a follow up letter to my previous letter dated November 5, 2007. In that letter I explained about the permit application that we are filing and some of the circumstances that I felt were pertinent to the application.

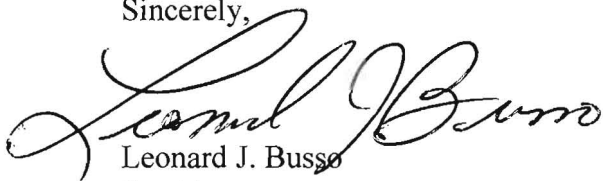

I would like to add that we are aware of new construction requires a septic field of 10,000 square feet and perk tests to show the land can accommodate this field. The existing field is certainly more than the 10,000 square feet and the fact that it is in existence shows that the land can accommodate this arrangement. I am asking that the existing system be sufficient to meet the requirements of your department to sign off on our permit application. We are requesting a variance for the Perk certificate.

In the previous letter I requested a meeting to discuss and resolve this issue. Since we are all busy at our positions if this can be resolved via this letter and a quick phone call then that may be best. If you feel that we should meet to discuss this then we will make ourselves available. I just would not like to take up too much of your time on this matter.

If you have any questions, please feel free to call me via my cell number 410-960-6776.

Thank you for your consideration and cooperation. I will follow up with you or Gabe Creighton to complete this matter.

Sincerely,

Leonard J. Busso
President
