REASON FOR INVESTIGATION ground water appearing below septic

RECEIVED BY Kacie DATE 3/25/04 ASSIGNED TO KN CODES \_\_\_\_\_ DATE 3/31

DATE OF INVESTIGATION \_\_\_\_\_ TIME \_\_\_\_\_ WEATHER \_\_\_\_\_

REPORT Ground water is coming up at the base of the hill down from our septic system. This winter the ice continued to grow taller & taller in the area that is marked "Pooling water" on Diagram. It was also coming up in the "Swampy area" melting ice & snow forming a small but steady stream of water w/ bright green grass surrounding it & algae growing in this swampy area as well. It is possible that it is just ground water, however, the way the ice formed in the pooling area, the bright green grass & the algae being present made me suspect a possible septic failure.
