RE: Percolation Testing  
4 Parcels (Route 108)  
Tax Map 34 Parcel 134

To Whom It May Concern:

Percolation testing conducted September 15, 1988 on the above property indicated limited satisfactory soil conditions.

Further review requires submission by a registered engineer of a plat showing certified locations and elevations of test holes and house and well sites. This should be submitted within sixty (60) days to allow field verification if necessary.

Follow-up testing in the wet season will likely be required.

If you have any questions regarding this matter, please feel free to contact me at the above address or by calling 461-9933.

Very truly yours,

Craig Williams, Director  
Water and Sewerage Program
