RE: Percolation Test Results
Application #: A34771 Retest
Proposed Use: Confirmation of Existing Easement
Property ID: Retler Property, Lot 3, Carr's Mill Road

Dear Ms. Retler:

Percolation testing conducted on April 29, 1998 on the above referenced property indicated less than satisfactory soil conditions in the vicinity of the existing platted easement. Satisfactory soil conditions were located in the northeast corner of the property.

Further review is contingent upon submission by a registered engineer of a percolation certification plat showing actual locations and elevation of all excavated test holes and a suitable house and well site. The plat should also include the location of the existing sewage easement on the property as well as the location of any relevant features such as streams, swales or existing structures. A note must be included certifying that all wells and septic systems within 100' of the property boundaries have been shown.

This should be submitted within sixty (60) days to allow field verification if necessary.

If you have any questions regarding this matter, please feel free to contact me at the address below or by calling 410-313-2640.

Very truly yours,

Mark Rifkin, R.S.
Water and Sewerage Program
