Sarah,

OK, terrific. Thanks.

If you go to 16177 Frederick Road, just be forewarned that the elderly woman who lives there, Charlotte Sirk, is rather cantankerous. She is harmless, but she will yell at you; she yells at everybody about everything.

I saw the well – it is on the south end of the house, between the house and the biggest barn/ garage. I forgot to write down the number - rats. Her son, Roger, and his wife, Barbara, live in the house at the bottom of her driveway, at 16181 Frederick Rd, close to the road (16177 is on the hill), but they will be at work during the day. They are very nice and if you have a problem, let me know (443-745-4214) and I'll call Roger.

Howard County oversaw a UST removal in August 1990, with MDE-OCP; did that not come up in your records?

There should be some UST records for 16177 Frederick Rd. There was a UST installed in 1970 and removed in approx. 2000. There were also 3 ASTs: one gasoline, one diesel, and one probably heating oil.

The only AST that I know about at 16181 Frederick Rd is the heating oil AST in their basement; I don't know of any USTs at 16181 Frederick Rd, but it would be interesting to know if you had anything.

Thank you!

Meg
