DEPARTMENT OF PUBLIC WORKS

Charles I. Ecker, County Executive

January 24, 1991

MEMO TO: Craig Williams, Director
Water and Sewerage Program
Howard County Health Department

FROM: Don Lieu, Chief **ODL**
Utility Design Division
Bureau of Engineering

SUBJECT: Availability of Public Sewer Service
to Parcel 532 on Tax Map 37

It has come to our attention that the subdivision of parcel 532 was for the purpose of the creation of one additional lot for the construction of a single family residence. It is our understanding that the owners wish to provide sewer service by using on site septic systems for both the existing and proposed homes.

Public sewer service to the referenced parcel would require a 400 foot main extension across two existing parcels at an estimated construction cost of approximately \$40,000.

After further consideration, we do not feel that sewer service to the proposed lot is readily available as defined in the Howard County Master Plan for Water and Sewerage as the extension cannot be accomplished in a cost effective manner.

Should you have any questions concerning the information provided, please do not hesitate to contact me at 313-2070.

BUREAU OF ENGINEERING

MEMORANDUM

TO: Mr. William E. Riley, Chief
Bureau of Engineering
Department of Public Works
Howard County Government

FROM: Craig Williams, Director *JEN for CW*
Water and Sewerage Program

SUBJECT: Availability of Public Water and/or Public Sewer
Tax Map: 37 Parcel: 532
Address: 8126 Forevergreen Court ←
Owner: Paul Nelson Frazier ← ?
Owner's Address: 8126 Forevergreen Court ←
Baltimore, Maryland 21227

Mr. Frazier has requested authorization from this office to perform percolation testing for subdivision on the above referenced property which is located in the Metropolitan Service District. Authorization is normally granted only for exceptional cases where public facilities are not "reasonably" available.

In order to determine if an exception is warranted, we request any information you can provide detailing the availability of public water and sewer to this property.

Thank you for your assistance.

DEPARTMENT OF PUBLIC WORKS

Charles I. Ecker, County Executive
James M. Irvin, Director

William E. Riley, Chief
Bureau of Engineering

December 5, 1990

MEMO TO: Craig Williams, Director
Water and Sewerage Program
Howard County Health Department

THROUGH: William E. Riley, Chief *William E. Riley*
Bureau of Engineering

FROM: Margaret K. Hartka, Project Manager *M.K.*
Utility Design Division
Bureau of Engineering

SUBJECT: Availability of Public Water and Sewerage Service
Tax Map 37, Parcel 532

In response to your November 23, 1990 memorandum, the subject parcel has been investigated. As is shown in Attachments 1 and 2, public water and sewer mains exist within the area immediately surrounding Parcel 532 even though the parcel is not currently fronted by them. Attachment 3 shows the topography in the area. Currently there are no utility easements which provide access to public water and sewer facilities from this parcel.

In order to provide sewer service to the subject parcel, the existing 8 inch sewer constructed under Contract 920 must be extended approximately 400 L.F. as shown on Attachment 3. Utility easements will be required for this construction.

Water service can be obtained by an extension from either the existing 6 inch main in Nightwind Court (approximately 200 L.F. away) or the existing 6 inch main in Forever Green Court (approximately 500 L.F. away). In either case, easements will be required from other property owners (see Attachment 4).

If the referenced property is to be subdivided, the property owner will be required to execute a developer agreement with the County and to build the necessary water and sewer mains using his own funds. This will require acquisition of the utility easements mentioned previously. In the event that the property owner is unable to obtain these easements, the County can, upon the

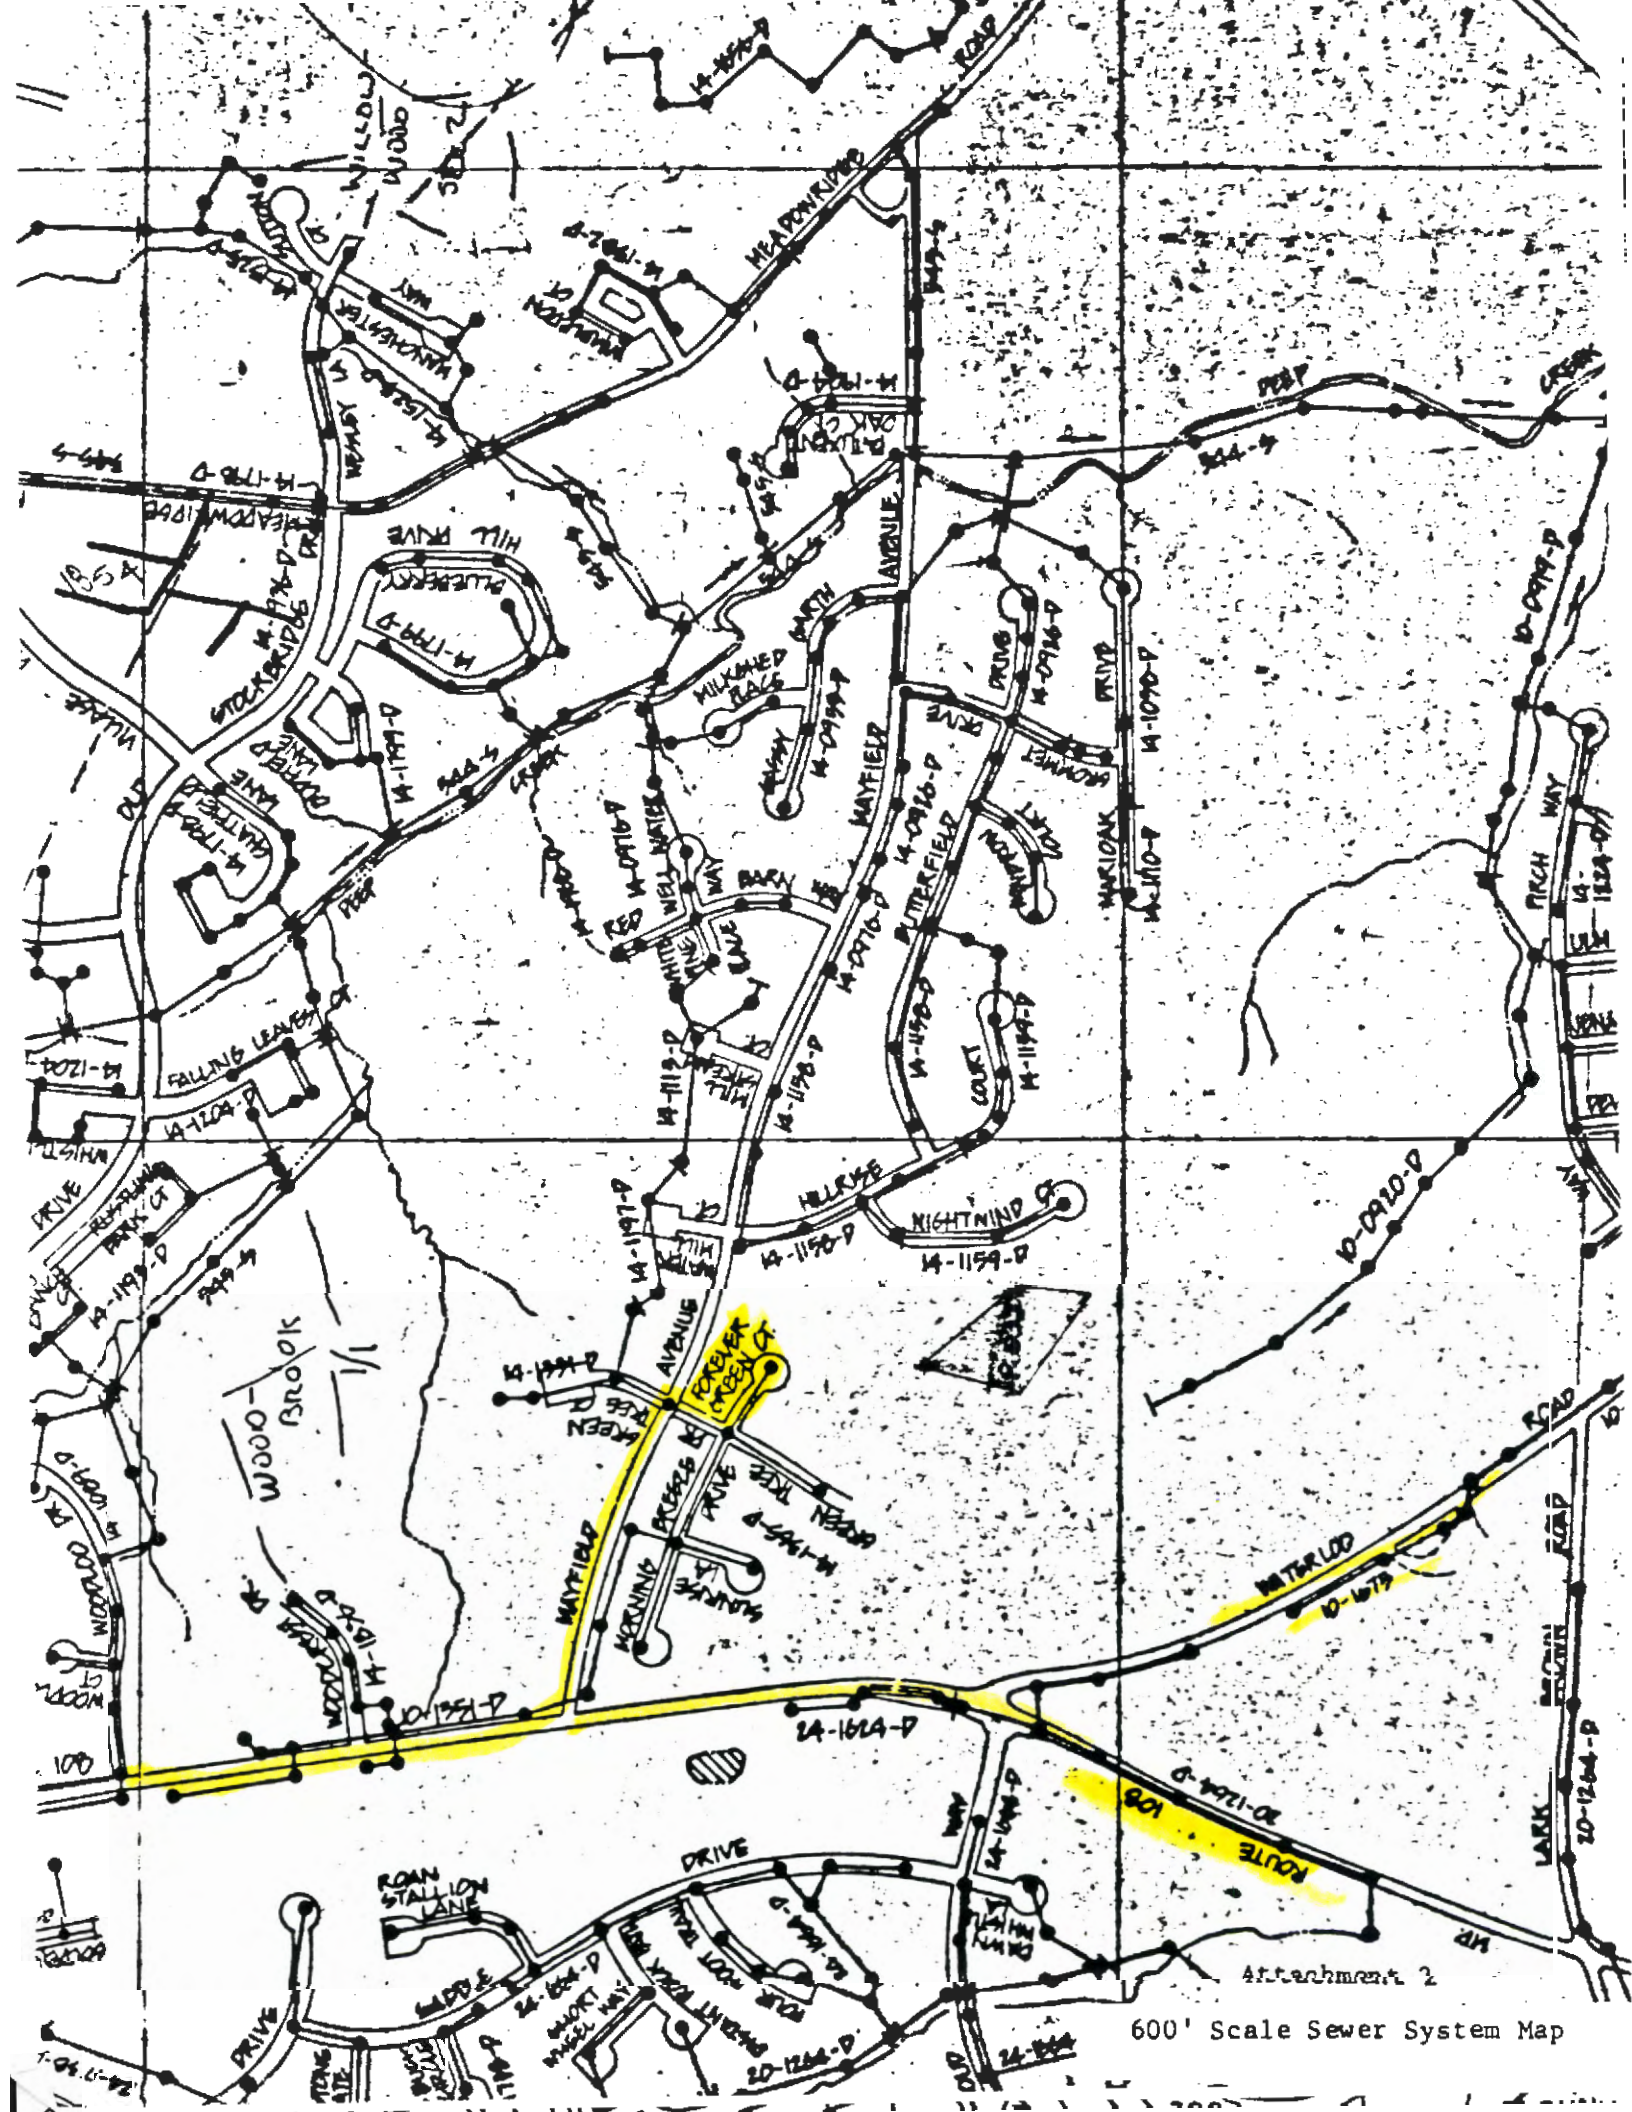

request of the owner, institute a capital project for this purpose. In order to qualify for such a project, the property owner must demonstrate through written documentation that every reasonable effort has been made to negotiate a settlement for the easements, and that such a settlement is not obtainable. In addition, the property owner must have established alignment and must demonstrate that the chosen alignment is the most appropriate route for the water and/or sewer main.

In summary, although public water and sewer services are not presently available to Parcel 532, such services can be extended from nearby mains. Although extension of these services will require the acquisition of easements, this will not bar private development of the property since, if it is necessary, these easements can be obtained by the County.

APPLICATION #'(s) A#46792 ; A# 46791
PROPOSED USE: single family dwellings
PROPERTY ID: 1 Parcel only
Tax Map #37 Grid #14
Parcel #532

Dear Mr. Paul Nelson Fragies :

Percolation testing conducted on March 11, 1991 on the above referenced property indicated ~~unsatisfactory~~ soil conditions. clay water table
Copies of the test results are enclosed. The present home is the only approved home with sufficient limited sewage repair for the future if public sewer is not available.

Further review is contingent upon submission [by a registered engineer] of a percolation certification plat showing actual locations and elevations of all excavated test holes and a suitable house and well site. [The plat should also include] [the following additional information]:

This should be submitted within sixty (60) days to allow field verification if necessary. If the proposal is for subdivision or for commercial use, a groundwater appropriations permit must be approved prior to approval of either the record plat or the site development plan.

If you have any questions regarding this matter, please feel free to contact me at the above address or by calling 461-9933.

Very truly yours,

Dear Mr. Frazier:

A percolation test date has been reserved for 10:00 a.m., Monday, March 11, 1991.

You will be responsible for having a contractor on-site to excavate test holes in the corners of the proposed percolation area and an additional test hole below the the existing septic system.

Please call this office between 8:30 a.m. and 4:30 p.m., Monday through Friday, to confirm your acceptance of this percolation test date.

Thank you for your cooperation in this matter.
