RE: Percolation Testing
Fanne M. Brown Property - Lot 2
Montgomery Road

Dear Mr. and Mrs. Guyer:

A percolation test date has been reserved for 10:00 a.m., Thursday, February 27, 1992.

You will be responsible for having a contractor on-site to excavate test holes at the corners of proposed percolation area.

Please call this office between 8:30 a.m. and 4:30 p.m., Monday through Friday, to confirm your acceptance of this percolation test date.

Thank you for your cooperation in this matter.

Very truly yours,

Craig Williams, Program Director
Water and Sewerage Program

RE: PERCOLATION TEST RESULTS
Application Numbers: A47831 & A47822
Proposed Use: Single Family Dwellings
Property ID: Fannie Brown Property
Proposed Lot 2 and Lot 3
Tax Map: 37 Parcel: 89

Dear Ms. Brown:

Percolation testing conducted April 7, 1992 on the above referenced property indicated unsatisfactory soil conditions. Generally acceptable soils conditions were established in the higher of the proposed two lots, but insufficient depth to groundwater was limiting to approval of the lower part. Copies of test results are enclosed.

Further review is contingent upon submission by a registered engineer of a percolation certification plat showing actual locations and elevations of all excavated test holes and a suitable house and well site. It may be possible to combine Lot 2 and Lot 3 to have a single house provided the lot is served by public water.

This should be submitted within sixty (60) days to allow field verification if necessary.

If you have any questions regarding this matter, please feel free to contact me at the above address or by calling 313-2640.

Very truly yours,

Raymond Hodges, R. S.

MEMORANDUM

TO: All Scheduled "Wet Season"
Percolation Test Applicants

FROM: Craig Williams, Program Director *CW/JEN*
Water and Sewerage Program

RE: Fannie M. Brown Property - Lots 3 *Kings*
Montgomery Road
Tax Map: 37 Parcel: 89

The water table level has not increased to a level that makes percolation testing for the Spring "Wet Season" evaluation meaningful.

Upon recommendation from the Maryland Department of the Environment, "Wet Season" percolation testing is postponed until further notice. Rainfall and groundwater table response will be monitored until such time as a determination is reached that "Wet Season" testing can be safely rescheduled.

No accurate prediction can be made of when that condition will occur.

Your February 27, 1992 test date has been postponed.

We regret any inconvenience this may cause you. You will be contacted for rescheduling at the earliest opportunity.

If you have not been contacted for rescheduling by April 1, 1992, please contact this office to see that you have not been overlooked.

MEMORANDUM

TO: Mr. Williams E. Riley, Chief
Department of Engineering
Department of Public Works
Howard County Government

FROM: Craig Williams, Program Director *C.W.*
Water and Sewerage Program

SUBJECT: Availability of Public Water and/or Public Sewer
Tax Map: 37 Parcel: 89
Address: 6354 Montgomery Road, Elkridge, Maryland 21227
Owner: Fannie M. Brown
Owner's Address:
6354 Montgomery Road, Elkridge, Maryland 21227

John and Karen Guyer has requested authorization from this office to conduct percolation tests in order to subdivide on the above referenced property which is located in the Metropolitan Service District. Authorization is normally granted only for exceptional cases where public facilities are not "reasonably" available.

In order to determine if an exception is warranted, we request any information you can provide detailing the availability of public water and sewer to this property.

Thank you for your assistance.

James M. Irvin, Director

October 29, 1991

Mr. Walter Park, Vice President
Land Design Engineering, Inc.
10620 Guilford Road, Suite 210
Jessup, Maryland 20794

Subject: Walter Brown Property
Permission for septic
field on 2 lots,
Parcel 89 of Tax Map 37
6358 Montgomery Road
Elkridge, MD 21227

Dear Mr. Park:

I am writing in response to your letter dated September 9, 1991, requesting permission to utilize septic fields on two proposed lots on parcel 89 along Montgomery Road. Our cursory review of the information provided indicates that several follow-up efforts are required. These includes additional engineering analysis by your staff as well as more coordination.

It may be possible to obtain sewer service via the existing County system. An 8-inch sewer main was constructed under capital project contract 10-1043 in Montgomery Road. A drop house connection was provided to serve the existing house. New lot #1 may be serviced from the existing sewer in Montgomery Road by regrading the lot. The same may be accomplished by regrading the first floor of the new lot #2.

The minimum septic field area as required by the Maryland Department of Health and Mental Hygiene is 10,000.00 square feet. The Soil tests need to be performed and submitted to the Howard County Health Department to determine the lot area required prior to final testing. A hydrogeological study of the proposed development may also be required. These two proposed lots currently meet the minimum lot requirement of the Howard County Subdivision and Zoning Regulations, so septic space may be a problem. For additional information, please contact the Howard County Health Department.

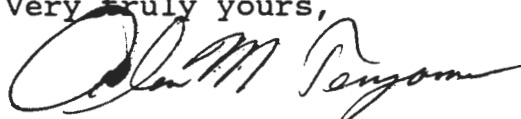

Mr. Walter Park
Walter Brown Property

October 29, 1991

Internal Memorandum

February 12, 1992

MEMO TO: Craig Williams, Program Director
Water and Sewerage Program
Bureau of Environmental Health

FROM: Diane A. Cerkanowicz *duc*
Utility Design Division
Bureau of Engineering

SUBJECT: Availability of Public Water and Public Sewer
Tax Map 37, Parcel 89
Address: 6354 Montgomery Road
Elkridge, Maryland 21227
Owner: Fannie Brown
6354 Montgomery Road
Elkridge, Maryland 21227

In response to your memorandum of January 29, 1992 we have researched the availability of public water and sewer service to the subject property.

According to the Department of Finance, The subject property is currently served by both public water and sewer which fronts the property on Montgomery Road.

Should the property be subdivided, public water service could be provided to the southern portion of the property through the public water main within Montgomery Road.

Due to the topography of the site, the nearest public gravity sewer service available to serve the southern portion of the property is contract 657-S. This sewer is 1400 feet southwest of the property. The cost to extend this sewer to the southern portion of the property would be approximately \$221,000. This cost includes design, land acquisition, inspection and construction.

While public water service is "reasonably" available to the property, public sewer service is not "reasonably" available to this property due to the high costs associated with extending the sewer.

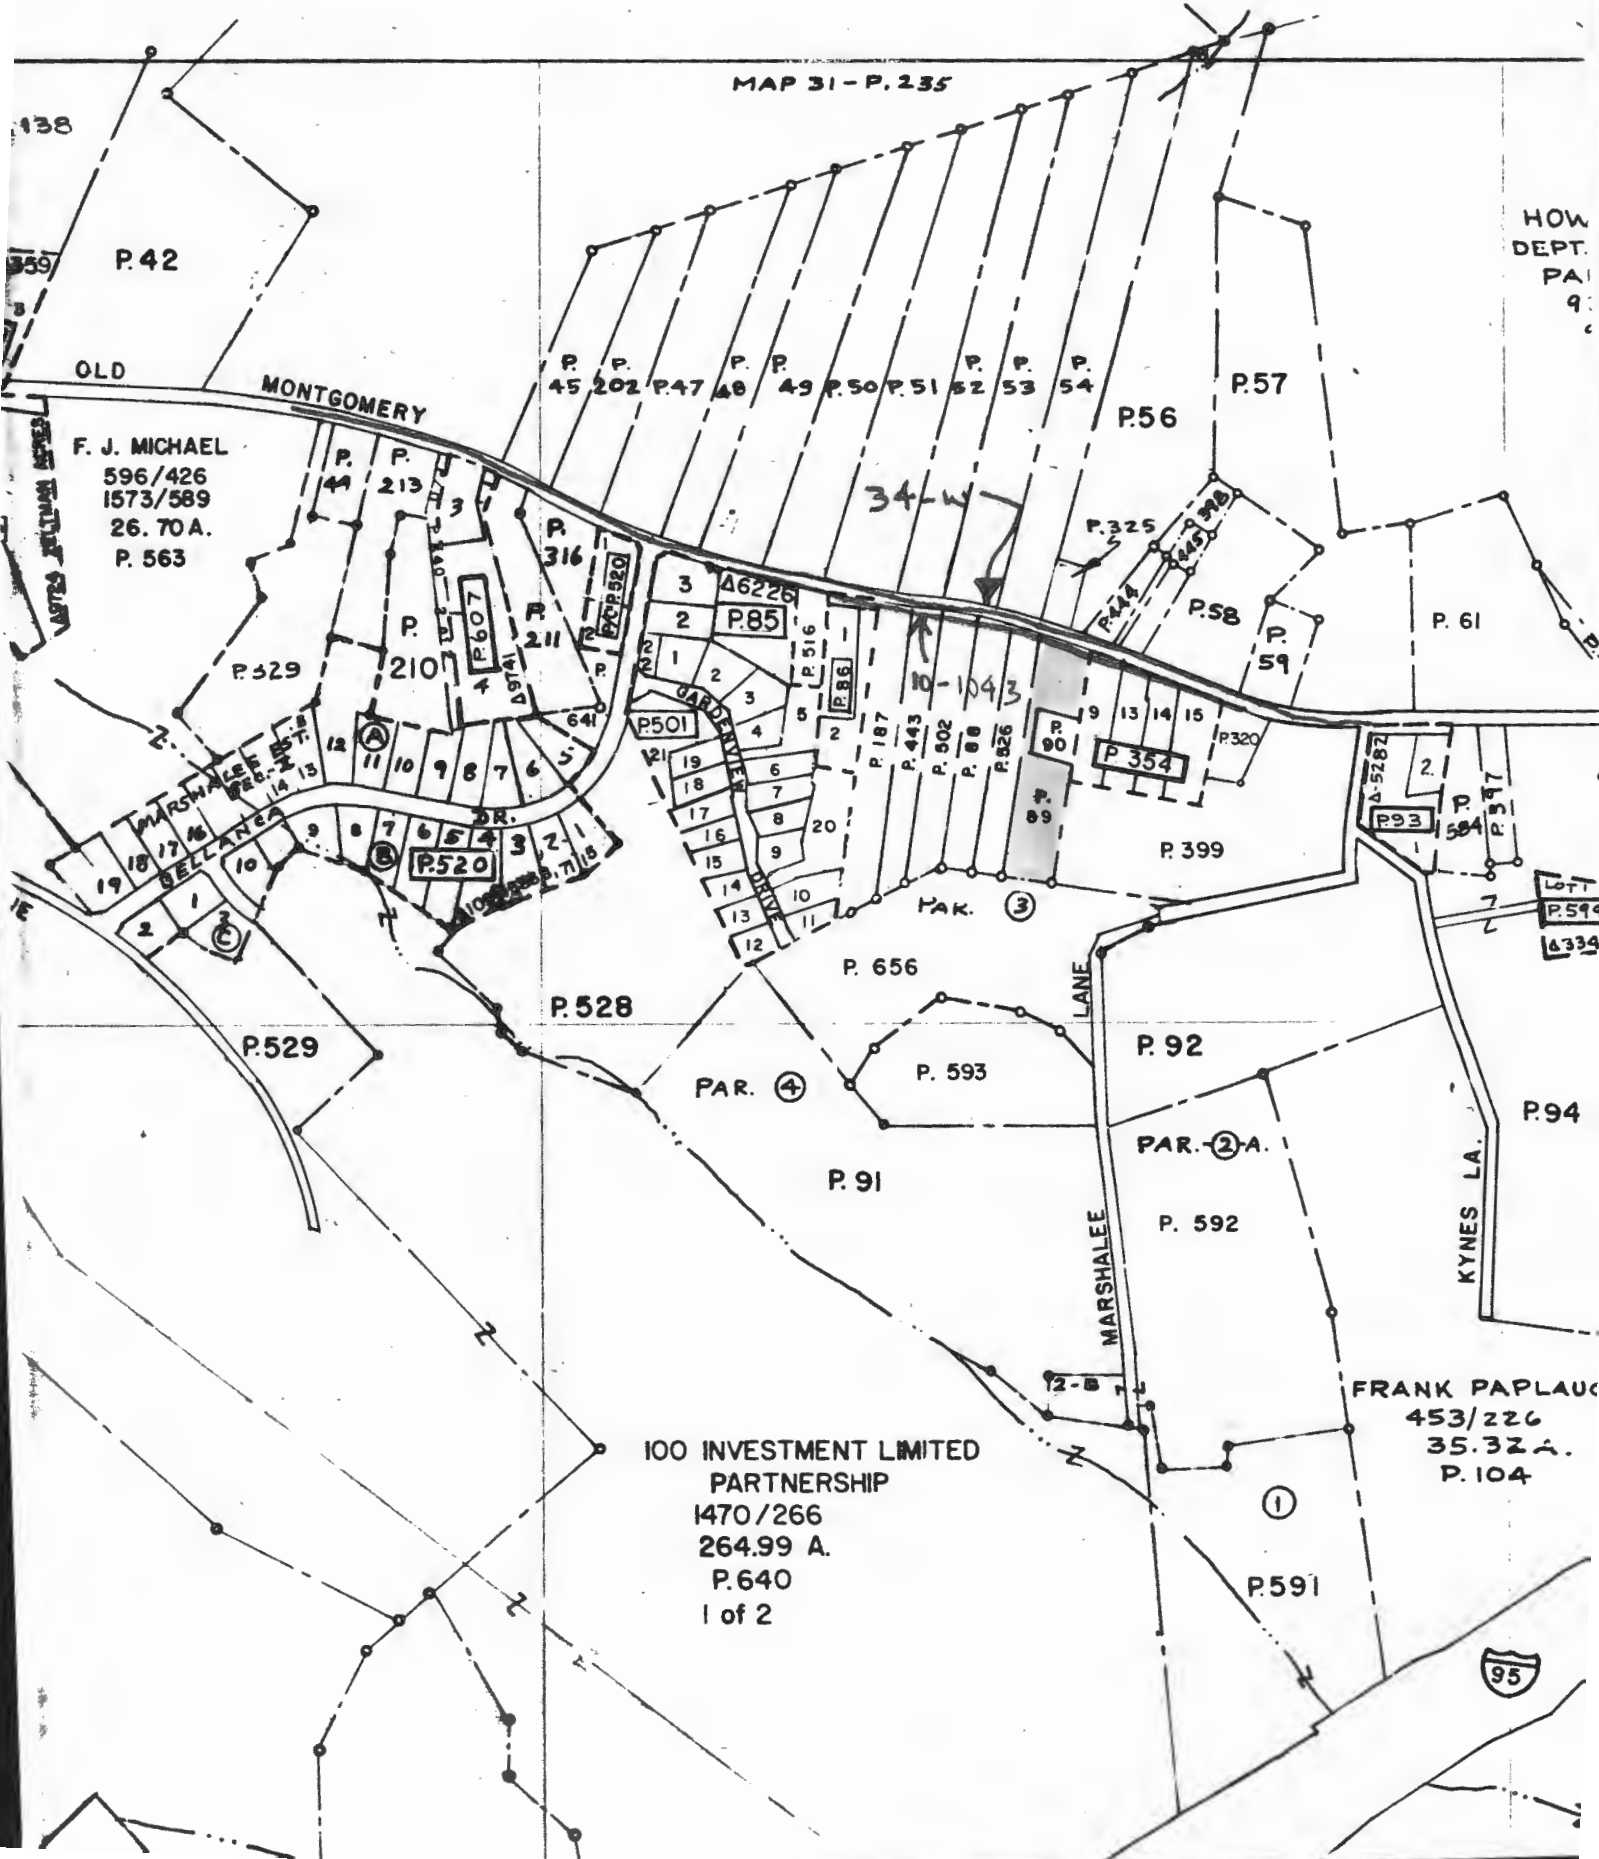

Attached, for your information are the 600 scale tax map, topo map, sewer map, water map and cost estimate sheet. If you have any questions or need more information, please call me at 313-3414.
