## Chronology from Health Department Records

### ROBB PROPERTY

- 10/25/75 Date of "Variance plat" used for original perk test from Boender Associates.
- 4/6/77 Mr. Robb visits Health Department, makes application for perk test.
- 5/26/77 Percolation tests conducted. Areas shown on "Variance plat" will not perc due to clay. New areas tested by backhoe operator and Sanitarian. Topography in Variance plat found to be inaccurate.
- 5/27/77
- 8/11/77 Noted on Robb file "needs new final plat, hold and file, DJO'N 8/11/77." Examination of final plat revealed that the "locations" of percolation area had not changed from the "Variance plat", and were in error.
- Health Department "fault" was to assume that an experienced real estate agent, and an experienced engineer would know that percolation test areas must be shown where percolation tests were conducted. Engineer informed that correct locations are needed.
- 9/1977 Two crops had grown on ground since percolation test. Engineer cannot find test sites. Health Department expends extra effort to help engineer locate test sites.
- In conclusion, the time lapses referred to in Mr. Robb's letter occurred.
- Feb.1-Apr.4, 1977 Before he had made application to the Health Department. Waits of up to 3 months for tests were common.
- May 27 - July 28 Health Department waits for plat.
- Aug. 11-Nov. 23 Health Department waits for (and assists in) proper field location of test holes and submission of final plat.

To prevent similar situations, the Health Department has instituted a policy of informing owners by mail whenever certified test hole locations are required.

Mr. Robb failed to explain that 3 acre zoning was adopted in the fall of 1978. That change caused a terrific demand for County agency services.
