Subject: FW: Inclement Weather Information

Dear Staff,

We've experienced inclement weather the last week and since questions have arisen I want to share as a reminder the following protocol.

In the event of inclement weather, please tune into the state website, local radio or television for closures and delays. Information regarding Howard County closings and liberal leave can be accessed by calling Howard County's Snow and Ice Hotline (410-313-4444) or by visiting the County's homepage at www.howardcountymd.gov where the latest inclement weather related information will be prominently displayed. The Maryland Department of Health and State of Maryland closings and liberal leave decisions may be obtained by calling 1-877-285-6407 or by accessing www.dbm.state.md.us on the web. Note, the State has automatic email and text alert sign-ups as a notification option for you. Our EP staff will send out notification and alerts however you always confirm by checking the websites listed above.

Please remember:

- If the State is closed, HCHD is closed; if County Gov't is closed, HCHD is closed.
- If State is on Liberal Leave, weather essential employees must report, all other employees may use available leave. Please check with your supervisor to determine if you are weather essential. When you are determined Essential by your Bureau, you must make every reasonable effort to get in on time.
- If County Gov't (but not State) is on Liberal Leave, HCHD staff report at usual time.
- If State or County Gov't has a delayed opening, the delay is determined by our start time which is 8 am. Therefore, a 2 hour delay means that ALL staff should report by 10 am unless you are on approved leave. If your normal start time is 9 am-- that does not mean you should come in at 11 am. You will still need to come in at 10 am. Employees arriving after the delayed opening time, will be charged leave as appropriate.
- **North Laurel employees please note the following:** *If the Department of Recreation & Parks closes the Community Center and the Health Department decides their North Laurel Health Office will remain open, the Health Department representative shall contact the Community Center Director or their representative of this decision with the times that they will remain open during the snow event. A Center Program Coordinator and/or Facility Leader will stay stationed at the Center to clear and salt walks. Community Center staff shall notify the East Zone Highways supervisor that the Health Office at the Center will remain open, their hours of operation during the snow event, and the need for plow & salt support for the roadway and lot. The Center Director shall notify the Construction Division Operations Supervisor III that the Health Office at the Center will remain open, and will remain in contact for plowing and salting assistance if Highways or their contractor is not available. The operator of truck #208 will be the designated back-up plow and salt operator. The roadway, bus stop and front parking spaces shall be cleared.*

Lastly, safety first! While we believe it is important to get staff into work when the State determines we are open for business, we want everyone to exercise good judgment. If the roads are not passable, then please contact your supervisor immediately and inform them of your situation. Weather can affect different areas of the State harder than others and many of us can get in to work when some may have a more difficult time due to road conditions. We trust you to use your best judgment.

Thank you,

Maura
