ADMINISTRATIVE POLICY AND PROCEDURE

1.0 PURPOSE:

Establish a procedure to define if wells may be retained at the time a property is connected to public water and how the individual water supply system is designed to prevent cross connection.

2.0 POLICY:

It is the policy of the Howard County Health Department to prevent cross connections between non-potable wells and the public water system.

3.0 AUTHORITY:

Howard County Code Sec. 3.906. - Cross connection prohibited.

There shall not be cross connection between an individual water supply system and other individual or public water supply systems.

Howard County Code Sec. 3.908. - Connection to public water system required.

(a)Public Water Connection. Except for property located outside the planned service area for water service and the Metropolitan District, wherever a water main for public use exists in any street or alley and directly abuts the property, the owner of all buildings constructed for human habitation, occupancy, or use shall connect to the public water main.

(b)Wells Prohibited. A well for potable use shall not be constructed on a property accessible to an adequate public water supply.

COMAR 26.03.01.05 Individual Water Supply and Individual Sewerage Systems.

The installation of individual water supply or individual sewerage systems shall be subject to the following requirements:

A. An individual water supply or individual sewerage system may not be permitted to be installed where an adequate community water or sewerage facility is available. If an existing community water or sewerage facility is inadequate or is not available, an interim individual water and sewerage system may be used as set forth in §B(1), (2), and (3), of this regulation.

Howard County Plan for Water and Sewerage 2011 Amendment (page 1-18) or future amendments Within the Planned Service Area, regardless of when an "adequate community water and/or sewer system will be available, if the minimum lot size is three (3) acres a developer may utilize permanent on-site water supply and individual sewer systems.

4.0 DEFINITIONS:

Community water supply system means a source of water and a distribution system, including treatment and storage facilities, whether publicly or privately owned, serving two or more individual lots.
