NUMBER OF BEDROOMS 4

- House is served by a shared community septic system. As part of the general permit for the community system, items previously installed or under construction include individual septic tank, connection from tank to common effluent line, community system headworks, and shared disposal fields.

- This portion of the septic installation permit is strictly limited to authorization of the individual pump in the pump pit with associated piping and electrical controls, and installation of the individual house sewer line. Location as per the signed building permit site plan, copy attached.

- Contact Health Department for inspection before covering the installation.

- For the pump test 48 hour advance notice of inspection is required. Where adequate notice has been provided, installation may proceed to completion one-half hour after the scheduled inspection time.

Annapolis, MD 21401

Attention: Dan Anderson

Subject: Lots 70, 71, 130, & 131  
Ashleigh Knolls Shared Septic System  
Water and Sewer Contract Number 50-3382 & 50-3383

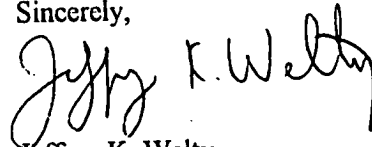

Dear Dan:

After reviewing your submission of the proposed lot changes for the Ashleigh subdivision, I would like to offer the following comments:

- 1) Since lots ~~70 and 71~~ have been approved for on-site systems, there is no problem in removing them from the proposed Phase II development (Contract 50-3382). However, since the addition of ~~lot 30~~ has been proposed under the red-line of this same contract, the lot cannot be connected to the shared septic facility until this contract has been placed in service. In addition, a letter from the developer to the Department of Public Works, Real Estate Services Division must amend the existing Developer's Agreement to include these changes.
- 2) In similar fashion, the addition of ~~lot 131~~ was presented as a red-line to contract 50-3383, which is Phase III. This lot cannot be connected until Phase III has been placed in service. Please include this change also in the developer's letter amending the developer's agreement.
- 3) In abandoning the connections for Lots 70 & 71, it not clear whether or not they have as yet been constructed. If not, simply eliminate their tees. If they have been constructed, then excavation over the pressure main must be conducted to abandon the connection at the tee; cut and cap the pipe at this point only with appropriate thrust protection.

Should you have any questions or comments, please feel free to call.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey K. Welty". The signature is written in a cursive style with a large initial "J".

Jeffrey K. Welty
