SEPTIC TANK CAPACITY 1250 GALLONS

NUMBER OF BEDROOMS 4

- House is served by a shared community septic system. As part of the general permit for the community system, items previously installed or under construction include individual septic tank, connection from tank to common effluent line, community system headworks, and shared disposal fields.

- This portion of the septic installation permit is strictly limited to authorization of the individual pump in the pump pit with associated piping and electrical controls, and installation of the individual house sewer line. Location as per the signed building permit site plan, copy attached.

- Contact Health Department for inspection before covering the installation.

- For the pump test 48 hour advance notice of inspection is required. Where adequate notice has been provided, installation may proceed to completion one-half hour after the scheduled inspection time.

Dr. Kukreti:
7141 Moorland Drive
Clarksville, Maryland 21029

RE: Ashleigh Knolls, Lot #49
7141 Moorland Drive
Well Permit #HO-94-0583

Dear Dr. Kukreti:

This to advise you that the septic system for the above referenced property was installed, inspected and approved on December 22, 1998.

The water sample recently submitted for testing was free of coliform and fecal coliform bacteria at the time of sampling and is bacteriologically safe for drinking.

The nitrate sample result was documented to be 11.0 ppm. A nitrate device has not been installed to treat the excessive nitrate contamination. COMAR 26.04.04.09 prohibits approval of any water supply with a nitrate-nitrogen contaminant level in excess of 10 parts per million. This department will grant a temporary deviation to that section of the regulation on condition that the nitrate removal system is installed within a period of **30 days** from receipt of this letter. The nitrate removal system must effectively maintain the nitrate-nitrogen contaminant level below 10 parts per million.

Furthermore, it will be necessary for you to comply with the following conditions:

1. The system must be properly operated and maintained continuously in accordance with the service contract for the life of the residence.
2. It is recommended that a yearly nitrate analysis be performed.
3. If you decide to sell or rent your home in the future, you must make any potential buyer/tenant aware of the above condition.

IT IS UNDERSTOOD THAT RE-EVALUATION OF THE UPPER SECTION OF THE WELL CASING AND GROUT SHALL BE REQUIRED PRIOR TO ISSUANCE OF FINAL CERTIFICATE-OF-POTABILITY

REQUEST FOR TEMPORARY DEVIATION TO CERTIFICATE OF POTABILITY

DATE: 1-5-98

PROPERTY OWNER: Dr. Kukreti

PROPERTY ADDRESS: 7141 Moorland Drive
Clarksville MD 21029

WELL PERMIT #: HO - - - - -

TESTIMONIAL: (Steps taken thus far by well owner to make the well water supply bacteriologically safe)

A reverse osmosis system was installed
at kitchen sink and icemaker to
eliminate nitrates

PLEDGE: (Steps to be taken by the well owner to bring the well into compliance with COMAR 26.04.04.09 within fifteen (15) days)

System above (reverse osmosis) should bring
water to compliance. Waiting for results
from water sample taken today ~~Monday~~ Tuesday 1-5-99

CONDITIONS:

- 1) Within fifteen (15) days, the well installed under permit #HO- - will be bacteriologically free resulting from approved disinfection procedures
- 2) If condition #1 is not met through disinfection techniques, then either:
 - a) an ultra violet disinfection system must be installed and maintained continuously to ensure a bacteriologically safe water supply
 - b) an order to abandon and seal the well will be issued

I hereby request that a 15 day Temporary Deviation to Certificate of Potability be granted for the well installed under permit #HO- - . I am fully aware of the conditions under which this deviation will be granted. I am fully aware of my responsibilities as the well owner.

*To the best of knowledge
I believe the above information
meets all necessary requirements for potability of the water*

Deep Kukreti

Re: Ashleigh Knolls
Lot 49

Dear Mr. Savage:

This is to certify that I inspected the well casing at the above referenced location on Monday, January 4, 1999 and found no problem with the well casing. Please keep in mind that when the well was originally grouted that 60 bags of cement were used.

Please call if you need any further information.

Very truly yours,

George F. Easterday, CWD/PI
