RE: PUBLIC SEWER CONN.

On 7/11/84, MR & AM made site insp at 10126 Green Clover Dr (Ms. Pavlo) in regards to the feasibility of public sewer conn. Insp revealed the sewer conn stub in direct conflict with at least 3 utility lines as indicated by spray paint ~~on~~ along the roadside.

Sanitarians used a lock level and tape to determine that difference in grade between stub and point (A) is $13\frac{1}{2}$ feet \pm , and the distance is 125'.

At min 1% fall = 1.25';
At min 2' cover at point (A)
total = 16.75' feet of fall; but ~~the~~ stub is only 15' deep below grade.

Recommend exception to permit septic repair; & advised homeowner of same; confirmation w/cw required. MR 7/12/84

9-13-00

T.C. & Carol Blood (Off. of Finance) Owner of this property now claims that Health Dept. told her that property could not be connected to public sewerage system in 1994 and she seeks rebate of Ad Valorem fces. Don Lieu of D. Plw. has indicated property can be serviced by public sewerage. In future, connection to public sewer would be required (when septic system fails) A. Shenn
